EXCURSIONS

WHICH BIN FOR SCHOOLS
PROGRAMMING

Government
of South Australia
Green Industries SA

ABOUT THE EXCURSIONS

Have you ever wondered what happens to your waste after the bin is emptied?

Go behind the scenes to find out.

Students can see various waste management sites in action, explore what happens to different materials and learn why choosing the right bin matters.

The experience connects directly to your school's waste audit, helping students understand the real-world impact of the waste they generate and the choices they make every day.

STUDENT INVOLVEMENT:

Up to 50 student leaders can take part in this complimentary excursion. Students will return to school equipped with the knowledge and resources to share their learning and inspire better waste and recycling habits across the school community.

NEXT STEPS

The excursion brings the learning journey together, helping students connect waste practices at school with what happens in the real world. A follow-up audit can then measure progress and highlight how your school has improved.

WHY TAKE PART?

WE'VE GOT THE LOGISTICS COVERED

AWARE organises bookings, transport, risk assessments, consent forms and required resources, providing a valuable learning experience at no cost to your school.

GO BEHIND THE SCENES

Give students a first-hand look at what happens to waste after it leaves the school, bringing the waste journey to life in a way a classroom can't.

EXPLORE THE CIRCULAR ECONOMY IN ACTION

See how materials can be recovered, recycled, composted and given a new life, helping prevent them from going to waste

CREATE STUDENT LEADERS WHO DRIVE CHANGE

Give your students the opportunity to become waste champions, equipping them with real-world knowledge and the confidence to share what they've learned and lead positive change across their school community.
